UTXO management

- ✈ A UTXO, is a portion of Bitcoin that's been received but not yet spent.
- ✈ Once a UTXO is used as an input, it cannot be used again in another transaction.
- ✈ A transaction involves inputs (UTXOs being spent) and outputs (new UTXOs created).

- ✈ Label your UTXOs.
- ✈ Consolidate when fees are low. (Privacy concerns).
- ✈ Future spending plans (what size and how many UTXOs you want to end up with).
- ✈ Withdraw from exchanges in larger amounts.
